Your pathway to
sustainable high quality
clinical education

Reveal problem areas

BPCLEtool is an organisational self-assessment tool that assists health organisations implement the Best Practice Clinical Learning Environment (BPCLE) Framework.

BPCLEtool's self-assessment process reveals aspects of the clinical learning environment where problems exist or where further improvement is desired.

Set goals and create an action plan

BPCLEtool suggests highly relevant action plan goals and tasks based on the ratings provided in your self-assessment.

Use these as the foundation for developing a quality improvement action plan tailored for your organisation.

Select indicators to monitor performance

Informed by the BPCLE Performance Monitoring Framework, BPCLEtool uses your self-assessment results to suggest indicators for your organisation to monitor.

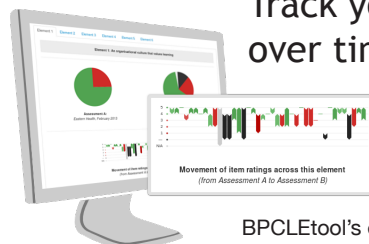

Compare yourself to similar organisations*

Compare your self-assessment results to results from similar organisations throughout your state. All data is de-identified to maintain confidentiality.

* available where there is sufficient data

Track your performance over time

BPCLEtool's easy to use reports allow you to compare one self-assessment to another, helping organisations who undertake several periodic assessments to view and analyse their progress.
